#### "Ten Acre Farms."

If your capital is limited you can make more money on ten acres than you can on one hundred acres. When you spread the labor and capital that is only sufficient to farm ten acres over a farm of seventy-five or a hundred acres you only succeed in wearing out yourself and your farm.

The "Ten Acre Farm" system will produce 100 bushels of corn or 2,000 pounds of tobacco per acre, and increase the fertility of your land each year.
